

OFFICE EXPORTER

REAL-TIME REPORTING

ABOUT OFFICE EXPORTER

Do you need to export data from Project to Office?

Do you find it too time consuming to generate your own reports for steer group meetings? Would you like to have automated documents or reports in other Office products? Then Office Exporter is just for you. Office Exporter allows you to export data from Microsoft Project Online into any Word and PowerPoint template.

REAL-TIME STATUS REPORTS IN MICROSOFT OFFICE

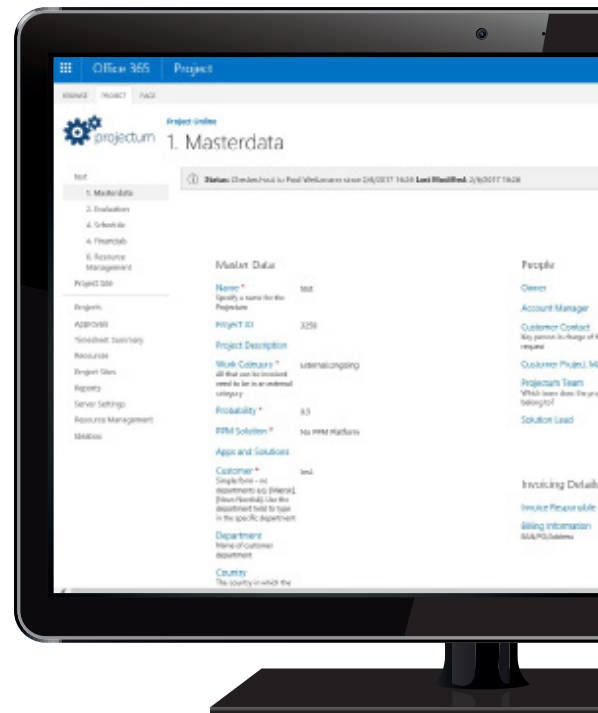

Fast and automated reporting in Microsoft Word and PowerPoint based on Project data.

Reduction of manual work creating office reports that are individually tailored to specific needs.

Easy configuration in your PPM solution.

WIDE ARRAY OF SOLUTIONS

Get a capacity overview from built-in, best-in-class reports. Besides exporting data to Word and Power Point, the Office Exporter also handles solution characteristics such as Standard fields, Custom fields, Central SharePoint lists and Financial data. With one click on your Project Detail Page in Microsoft Project Online, your most important reports will populate automatically.
