

REPORTING HUB

ABOUT REPORTING HUB

FOR INSTANT REPORTING

Sensei's Reporting Hub™ provides an enterprise-level data warehouse for Microsoft PPM that is hosted in Azure. The Reporting Hub™ synchronizes the data from Project Online in real-time and allows for reporting across Line of Business systems. With the Reporting Hub™, you can get instant reporting on all data maintained in Project Online using a fast and reliable SQL Database connection.

BENEFITS FOR INSTANT REPORTING

Most existing on-premise reports can be easily moved to Project Online with little or no changes.

Your Project Online data is available in real-time with no maintenance requirements.

Data is secured and stored in your dedicated Database in your nearest Azure data center

You don't need to develop reports using slow OData queries as Reporting Hub is fast to retrieve your reports.

Extend your Reporting Hub database to include data from other Line of Business applications for reporting purposes.
